

Assembly Instructions

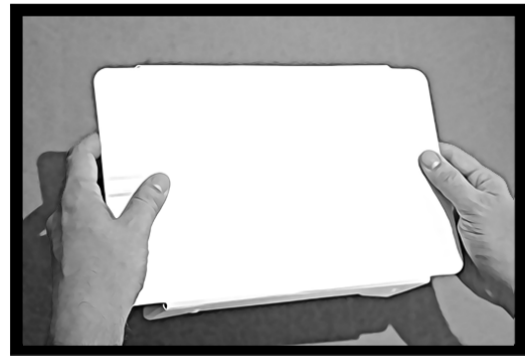

1. Insert your thumb into the groove between the two snaps and slide your thumb towards one snap to open. Repeat step to unsnap other side.

2. Flatten the table and unfold the flaps. The braces will automatically open towards each other.

3. Attach the braces together using the hook-and-loop dots along the short sides of the table.

4. The table is ready! Simply reverse these steps for disassembly!

Never open snaps by pulling on plastic tabs. Always slide a finger between snapped areas and apply gentle pressure.
